STP@ASU   Cairo ,EG
- Implemented needed online campaign services with the team members
- Visualize Form responses in an easy to interact way for the activity members

PROJECTS

Ecommerce 🔗   06/2024 – 06/2024
eCommerce web application using Angular. The platform enables users to browse products, view detailed product descriptions, and make purchases through a user-friendly interface.mplex and user-friendly frontend applications

Movie App 🔗
Developed a feature-rich movie application using HTML, CSS, JavaScript, jQuery, DOM, BOM, and AJAX. The app provides an intuitive interface for users to browse, rate, and add movies. It employs CRUD (Create, Read, Update, Delete) operations and AJAX to interact efficiently with a backend server.
